

**6th International Ontological Workshop**  
**Contemporary Polish Ontology**

**Warsaw, May 9 – 11, 2016**

**at the International Center for Formal Ontology (ICFO)**

The workshop will comprise presentations by Polish ontologists on a wide range of ontological issues. On the one hand, it aims to consolidate Polish ontological circles, and, on the other, to demonstrate that Polish ontologists address important ontological problems and propose adequate solutions. Thus, an important outcome of the workshop will be the publication of a post-workshop monograph by a prestigious foreign publishing house (most probably de Gruyter). The publication will consist of the positively reviewed high quality papers. Presentations and papers will be classified into the following topics: analytic ontology, applied ontology, ontology of mind, ontology of mathematics and science, phenomenological ontology, topological ontology, Thomistic ontology, and other related topics.

**Organizing Committee**

**Mirosław Szatkowski** (International Center for Formal Ontology, Poland) – chair

**Tomasz Bigaj** (University of Warsaw, Poland)

**Paweł Garbacz** (John Paul II Catholic University of Lublin, Poland)

**Marek Piwowarczyk** (John Paul II Catholic University of Lublin, Poland)

**Marek Rosiak** (University of Łódź, Poland)

**Bartłomiej Skowron** (International Center for Formal Ontology, Poland)

**Rafał Urbaniak** (University of Gdańsk, Poland; Ghent University, Belgium)
